## MOTOR COACH CLUB

" It was so foggy last night--I'm amazed that we didn't have an accident ! "

**LEGISLATION:** The unfair Law that took away motor home owners' rights to rest at night along highways, has been repealed by the Senate; is now in Assembly for action. Senate warning: keep roadsides free of wastes or a new law will be written. 'Nuff said! Most members know that their organization did as much as any other group to help repeal this bad law. In **NUMBERS---**strength!

**CALLING CARDS:** Club members desiring special Ultra Van Picture Calling Cards may drop the office a request and a nice quantity will be made up. The very excellent idea and the source for these cards comes from the inventiveness and the generosity of the Phillips #280, who called your editor to offer it.

**COOL OIL:** Some of our members are installing aluminum oil pans that hold an extra quart or so. #293 and #226 like the deep air-cooling fins too. You can get one at any Speed Shop, or order by mail from Whitney & Co., 1917 Archer Ave., Chicago 60616. Cost \$20.95 plus postage. New gasket is 79¢ extra.

**IDENTIFICATION SYSTEM:** Without cost to members your club is supplying and attaching VINYL SERIAL NUMBERS (front & rear) to each coach the first rally attended. A supply of these black and gold numbers will be on hand at the next club meet for any UV not thus beautifully dressed-up.

**TEFLON ULTRA VAN:** We all know about Teflon cookware; now be the first to have a Teflon UV. This fine Dupont product is available in most Housewares Depts. as a spray for under \$2. One brand is called "SLIP AWAY". Have your vehicle perfectly clean first, then spray colorless Teflon all over the front end. Fog a very light mist on the windshield too. Bugs bounce right off, don't cling. Dirt, grime, bugs that do spatter, rinse off easily.

**SYNCHRONIZER:** We will bring our Uni-Syn Carburetor Tuning Instrument along to the next rally. Have used it to tune the engine of our Porsche car, and now the UltraVan engine. It is designed to balance any 2 or 4 carb engine - precisely. This means smooth power! All members coming to the next outing are most welcome to use it to tune up their Corvairs.

**THRONE GROAN:** A tablespoon of Crisco or soft cooking-lard (any water-soluble grease) is a good lube for the impeller blades of your Chopper Pump. If you notice the pump gradually getting a bit sluggish, try "Spry" before it slows to a stop. Pump usually works like new again after above treatment.

**SHOCKING NEWS:** Information from #237 that every member should keep handy in case of future need; especially those who may "load up" their Vans extra heavy: Our President just installed #ff-222 Monroe LOAD-LEVELERS (rear) and #C-134 Columbus Heavy-Duty (front). Jordan Tire Service, Inc., Hemet, Calif., have excellent alignment equipment too. #108 also called - Sears have Adjustable OVERLOAD SHOCKS to fit our vehicles...order for FRONT '60-64 Chevy II Front; REAR '60-64 Corvair Front. Valuable data - Thanks men.

**PATRIOTISM:** Some citizens can not recite the Declaration of Independence, nor are able to click off the Bill of Rights from memory. But, UV owners can display our Nation's Flag at rallies during daylight hours. Stationery stores have cotton flags. For Nylon flags (long lasting) check boat stores. Popular size - 8"x10". Do you not agree more of us should display pride of country?

**RUBBER HOSE:** The water in your tank will be no purer than what you fill it with. Water standing in some hose (plastic or rubber) gets a very "strong taste". When we fill up with "any old hose", without first running plenty through it, we can be drinking terrible water even if our tanks are sweet!!

### ORDER BLANK

(IF ORDERING FOR SEVERAL PERSONS, LIST NAMES TO BE PRINTED ON SEPARATE SHEET.)

Our own beautiful new 4-color CLUB BADGES are being made. Members should place orders now - so imprinting with first and last names can be done during manufacture. The Club's cost comes to net \$1.80 each complete. If members send \$2.00 per Badge tax & postage is covered
