

# 1980 INFLATION UPDATE

"Inflation, depression, prosperity...when a pendulum swings, it usually swings back."

(A)

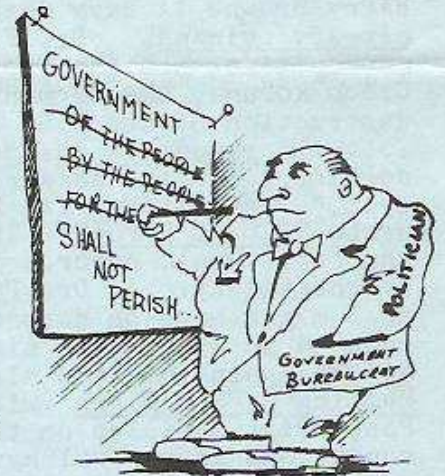

After my last article I was asked to continue to write up any pertinent economic developments. Therefore, offered below is a "gist" of what the Advisory Services and the best financial minds in the world have been saying lately. Of course, the material here will not apply to everyone...because some families have already taken the steps necessary to ease the effects of inflation. However, if you have not, then this could be one of the most important pieces of paper you have ever held in your hands. That is, if you decide yet to make some moves, even this late, to cover yourself. There is no place to hide. Most of us can figure out for ourselves at least a few methods to diversify enough to provide some inflation and/or deflation protection during this period when the economy is coming unglued. Everything will turn out fine for those who are prepared. I am very optimistic for America. Now...if a reader feels that this 1980 UPDATE (which gives an "insight" BEHIND the economy) will not be of assistance, or that it might DISTURB him, please...use your option to stop reading here.

Many of you already know that most of the nation's large banks, like City National and Chase Manhattan, recently raised the prime interest rate up to 15 3/4%, the highest in all time U.S. history. This event will no doubt be reflected everywhere as the results trickle down into the economy. It will add to the cost of doing business and eventually will reach the retail price structure. Therefore, with occasional ups and downs, we almost know for certain...what to look for in the long run...MORE INFLATION, followed they say sometime in the future by a bust.

No Family, no City, no Nation can spend more than it takes in for very long, without serious or dire consequences. The U.S. National Debt, we are told, is now growing by more than \$1 Billion a day. It is difficult to even begin to comprehend such a sum...ONE BILLION of anything is a tremendous total. One billion minutes ago Christ was walking here on earth. Now, each day, the National Debt increases another billion dollars...and there seems to be little concern by our government to reduce the very frightening deficit which is the engine of our present inflation.

Iran is lost! Will Saudi Arabia be next? Even now, while Iran hates us, burns our flag, takes our Diplomats hostage, most of the other Arab Nations are still accepting our depreciating dollars for their black liquid crude. If they should suddenly decide to take only the ECU or some other European "basket currency" in payment for their oil, as they have threatened to do if ours loses another 5% in value (which it has done since they said that) the American dollar will drop like a stone overnight. Even though it be head-over-heels in debt, our government will not go broke. It prints the money. It is our money that is going broke! That is your reporter's opinion. I'd like to have yours?

Several members have asked us to explain more fully about purchasing American Express Travelers Checks in stronger currencies (like the Swiss franc). Well, large banks sell them, usually charging a fee of 1% to buy or sell. You do not have to go to foreign lands to cash them in. At any future date you can convert them back to dollars locally. If the dollar has dropped in value meanwhile, you PROFIT, since your Swiss franc checks will buy more of them. No one can predict for sure, but the Swiss currency is considered one of the strongest in the world. This would be just one other way to diversify which most Advisors urge we should.

There seemed to be quite a bit of interest at both of the Inflation Survival Meetings during the National Ultra Rally at Hannibal, Missouri. Guess we attempted to solve all of the world's problems, plus our own? One thing can be said, no one in this club is ignorant of the financial debacle still facing us. Now if the Economists could predict exactly if and when and how serious those problems will turn out to be! The sessions at Hannibal were requested by several of the members and my hope is that we were able to be of some help to those attending. If there are any further questions on the subject, please feel free to call or drop a note and I'll do my best to provide the answers or find the information desired.

Like was explained at the meeting, the continually "increasing prices" (on everything) are trying to tell us something - that there is less and less confidence in printed green paper. With the reduced security it affords, everyone wants more of it to compensate. More and more people are learning to get their money into something solid and substantial and into real things ...thus out of dollar-denominated assets as much as possible.

There are around 300 MILLION PEOPLE in this country. At this writing perhaps less than 5% are yet aware that they are being fleeced like sheep - that's only 15 million who now realize that their savings are going down the drain and they are doing something about it. Just wait until the remaining 285 million (two hundred and eighty five million people) suddenly wake up! If that time should come they will try to unload their worth-less-and-less greenbacks. To WHOM? There will be no escape then. My advisors say that clients must rush to start action on the "Theory of Contrary Opinion" now. One analogy: In Israel it is already too late - last week their annual inflation rate shot up to over 130%.

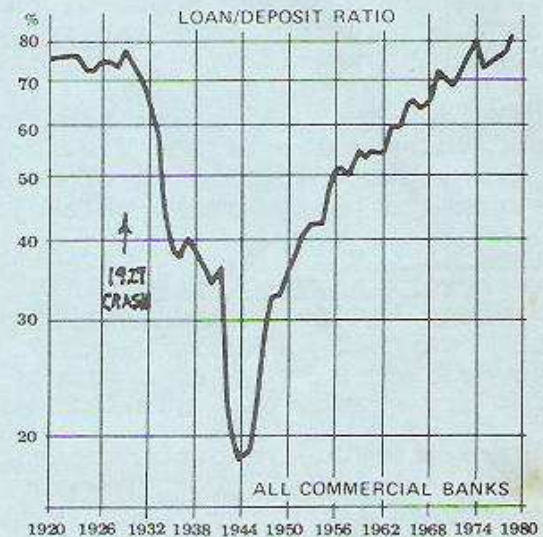

Will our government call in the dollar and issue a new currency? I ask this because your answer might help you in making future decisions. Economist Harry Browne (I have read two of his books) believes the new currency is already printed. Dr. Franz Pick, one of the world's most respected monetary authorities, has this to say, "I have lived through the destruction of the Czech koruna, the German mark, the French franc....and I'm now witnessing the destruction of the U.S. dollar. It will be wiped out. The U.S. government ....will repudiate its debts by exchanging 20 old dollars for each new dollar....perhaps as early as 1980....our assets are melting away before our eyes." We all realize he may be wrong about this, but two-years ago I wrote SPECIAL REPORT - THE INVESTMENT CLIMATE in which it was pointed out that this could occur. Suggestions were made then on how to cope with such a probability. If Dr. Pick should happen to be right, then that \$10,000 you or I might have on deposit, or in T-Bills, or wherever, would overnight be reduced to \$500. It might be good to get out and re-read that Special Report again now, and also the one issued later reporting on the Monetary Meeting in San Diego (with the Greek Coins on page one). Both of those Postscript Articles on the economy are as valid today as then, except that conditions in general have become worse, much worse. One example: the government admitted inflation rate last year was 9%. Lately it has been 14% plus. Then too, the actual rate is higher than the admitted rate.

Economist James Sibbet says that the precious metals may seem priced out-of-sight right now, but he says, just wait a year or two and the present cost of silver and gold coins will then seem cheap. He gives reasons and they appear logical. It isn't that coins have gone up in price (or anything else) but rather that the dollar has lost its value and buys less.

IT IS ALREADY HAPPENING - some retail dealers are starting to advertise that they will accept silver coins for the purchase of their merchandise. For instance, a Gasoline Service Station in California is selling gas for 10¢ per gallon. Your dimes must be dated 1964 or earlier. Wish all of us had bought a few more bags of them 3-4 years ago! A Land Developer in Missouri is selling full one-acre home sites for \$125 each if paid in pre-65 dollars. A Sporting Goods Store in Oregon has two prices for each item, ie: a Mauser 30-06 Hunting Rifle is priced at \$169.95 (for regular money) or they will sell the same item for only \$23 in 1964 or earlier silver coins. They would rather have the \$23 in coins than inflated currency. Dealers learn fast. I'll bring a copy of this ad to the next rally.

At the second Inflation Survival Meeting held at the National Rally, one member told of his experience at a Savings and Loan Association recently - he had gone in to withdraw part of his deposit and was told he would have to wait, I believe a week or two, for his funds. Some S & Ls are already short on available cash. You may have heard - two of the nation's largest, Home S & L and American S & L, closed their windows (we hope temporarily) to new construction loans about three weeks ago. Some eastern Banks have stopped early withdrawals on certificates of deposit. All this confirms that there is a liquidity problem. Beware.

The CHART at the right from Holt Investment Advisory, indicates the liquidity of our Nation's large banks. By law, the amount of cash on hand to take care of those who wish to withdraw, was required to be 5½%. About two weeks ago the Federal Reserve again dropped this by ½%, down now to only 5%. So there is a squeeze going on and instead of protecting the public and their deposits, the Federal Reserve relaxed the rules so the banks now loan out more than ever...have less on hand. It might be pointed out that the loan-to-deposit graph line (in the Chart) has reached a point above the peak of 50-years ago. I am including this Chart because it may help explain another signal that the present economic climate is not the best. Information like this is generally not easy to obtain from newspapers or the like.

The banking system was unusually liquid at the end of WWII, but now it is as fully loaned out as it was back in the 1920's. This will affect future business activities in many ways.

Maybe some readers would like to see monetary expert Howard Ruff on television. His half-hour program "RUFF HOUSE" is on the air every week now on about 300 television stations from coast to coast. Check your local TV Guide for time and station.

Back in the 1930s people were more docil than now. They willingly stood in the soup lines patiently waiting their turn. Now things are different and people are more impatient. If the same conditions ever return (perhaps they won't) the situation could very well be quite different. A few rough bullies would probably "capture" or take over the handout kitchens for themselves...so says Economist Howard Ruff. We can imagine the rest of the picture. Ruff says that right now, if you haven't done so, might be a good time to get a year's supply of long-term dehydrated products that will be tasty and nourishing 5 to 20 years from now. It is another way to also further diversify...and reduce dollar-denominated assets.

Millions of younger families in this country are "Nothingaires". They live in expensive new homes...with 10% down. They drive luxurious automobiles ...for so much per month. They have appliances, clothes, every convenience available...purchased with a plastic card. None have had experience with any depression. They will suffer the most when times get rough unless they heed history now. Credit has given them a false sense of wealth.

During our Ultra Coach traveling this fall through Montana, Minnesota, Iowa, Missouri, Arizona, etc., we noted the large number of closed Service Stations across the country. There are thousands of Oil Stations, as well as many thousands of other small businesses, that have gone bankrupt this year. All of us feel sorry for the owners who have lost their life's savings, but it is bleak reality due to the turbulent conditions. You do not read much about this in the average newspaper. Yet, inflation with its disruptive action, could be ended if our government balanced its budget and stopped increasing the money supply. After over 20-years of research and study of the economy. I'm convinced there is no other sound solution.

International Moneyline, in the November 14th issue, says, "...there is going to be another 1929." Also, that one's home (perhaps purchased some years ago) could be one of the soundest investments. Their twice-a-month investment Bulletins are NOT forecasts of doom, but rather (as I hope this 1980 UPDATE proves to be) news about the economy that can assist all of us to PROSPER through the next few years of upheaval.

World Market Perspective, like the above Advisor, indicates "...there will soon be a rash of bank failures." Dr. E. L. Anderson, Ph.D., says that "according to our calculations--the United States dollar is ready to collapse." He has shown by charts how the various indexes, when graphed, show the curves going straight-up now. He claims they can't do this for very long without crashing straight down. He admits he could be wrong.

Have you seen it? The new, smaller-sized dollar coin is symbolic of the declining value of the U.S. dollar in the world today. It LOOKS cheap and it is, since it is made of metal with little or no value. Really, its size resembles the quarter, which is about all a dollar is worth now anyway.

Back in the 1930s, for those who do not know or may not remember, people were very short of cash. With so many banks closing, many had lost their savings and for many, their incomes were cut off also. But ingenuity was the order of the day, and they learned to barter. I.e.: Some doctors agreed to deliver a baby for a side of beef, and farmers took in a crate of eggs for groceries, etc. That is American History from that era.

There are those who think the government will not let a depression happen again. They have the "power" to prevent such a problem. Well, they haven't prevented inflation. And, with ups and downs, we have lots more of it to come. On the other hand, some of my readers may not agree even with that? If anyone thinks that the government will soon balance the budget, plus end the deficit, and stop printing funny money, then we'll all admit that quick solutions could soon occur. It is getting late! There aren't too many ways left to skin the cat.

In this INFLATION UPDATE article for 1980, we have tried to present the latest information from the various Advisory Services for the benefit of Ultra Club members. Our club "By-Laws" state that we are bound together

for mutual benefit--for exchange of ideas--and that does not mean only mechanical ideas regarding our vehicles, but social, cultural, activities, as well as crafts, good food, plus travel, and, of course, good times at rallies.

It is our hope that this 4-page article about INFLATION which concerns most everyone nowadays, will prove useful to each reader. We have tried to make AWARE - not to scare. From long experience, it is known that even when many agree, few take action. Remember, when the 285-million wake up it will be far too late. When will they? 1 month? 2 years?

What should we do, or not do now? Each of us must decide - for himself or herself. Read page (B) again. See POSTSCRIPTS "The Report on The San Diego Meeting"....it has addresses on page #4 that you can use if you desire. Some safeguards are still OK.

Sincerely,

**Don't Be Late**  
Jan. 24-27 1980 Come as early as you like

# ULTRA RALLY

PINAL COUNTY FAIRGROUNDS - NEAR CASA GRANDE, ARIZ.

Tentative Schedule Only!!!

Please Check Bulletin Board.

Every Day: 9:00 A.M. Coffee Hour

Thursday: 6:00 P.M. - "Bonfire" -  
Weiner Roast. Bring Your Own  
Hot Dogs.

Evening: Anyone who wants  
to show your best film or slides.

\$3.50 per nite with electric

\$1.50 per nite without

Ample parking with water, showers  
& dump station for all.

Friday Morning: Visiting sites as shown on map sheet.

Those remaining: A recipe exchange, show & tell, etc.

1:30 P.M. Board of Directors Meeting.

3:00 P.M. Rally Flea Market - Bring any items to sell. Must be priced & bear your name.

Tech Sessions and Ladies Crafts will be scheduled.

6:00 P.M. Dinner at Moose Club: Fish and Chicken and Salad Bar.

"All You Can Eat" - \$3.50

Evening: Games & Film & Slides.

Sat. - 10:00 - Tech Session and Ladies Crafts

2:00 P.M. - General Meeting

6:00 P.M. - Ultra "Pot Luck" Buffet

8:00 P.M. - Randy Suckow will show slides from Africa and tell of his  
year of missionary work there.

Later: Games, etc.

Sun. - 10:00 A.M. - Devotional Services

Hosts:

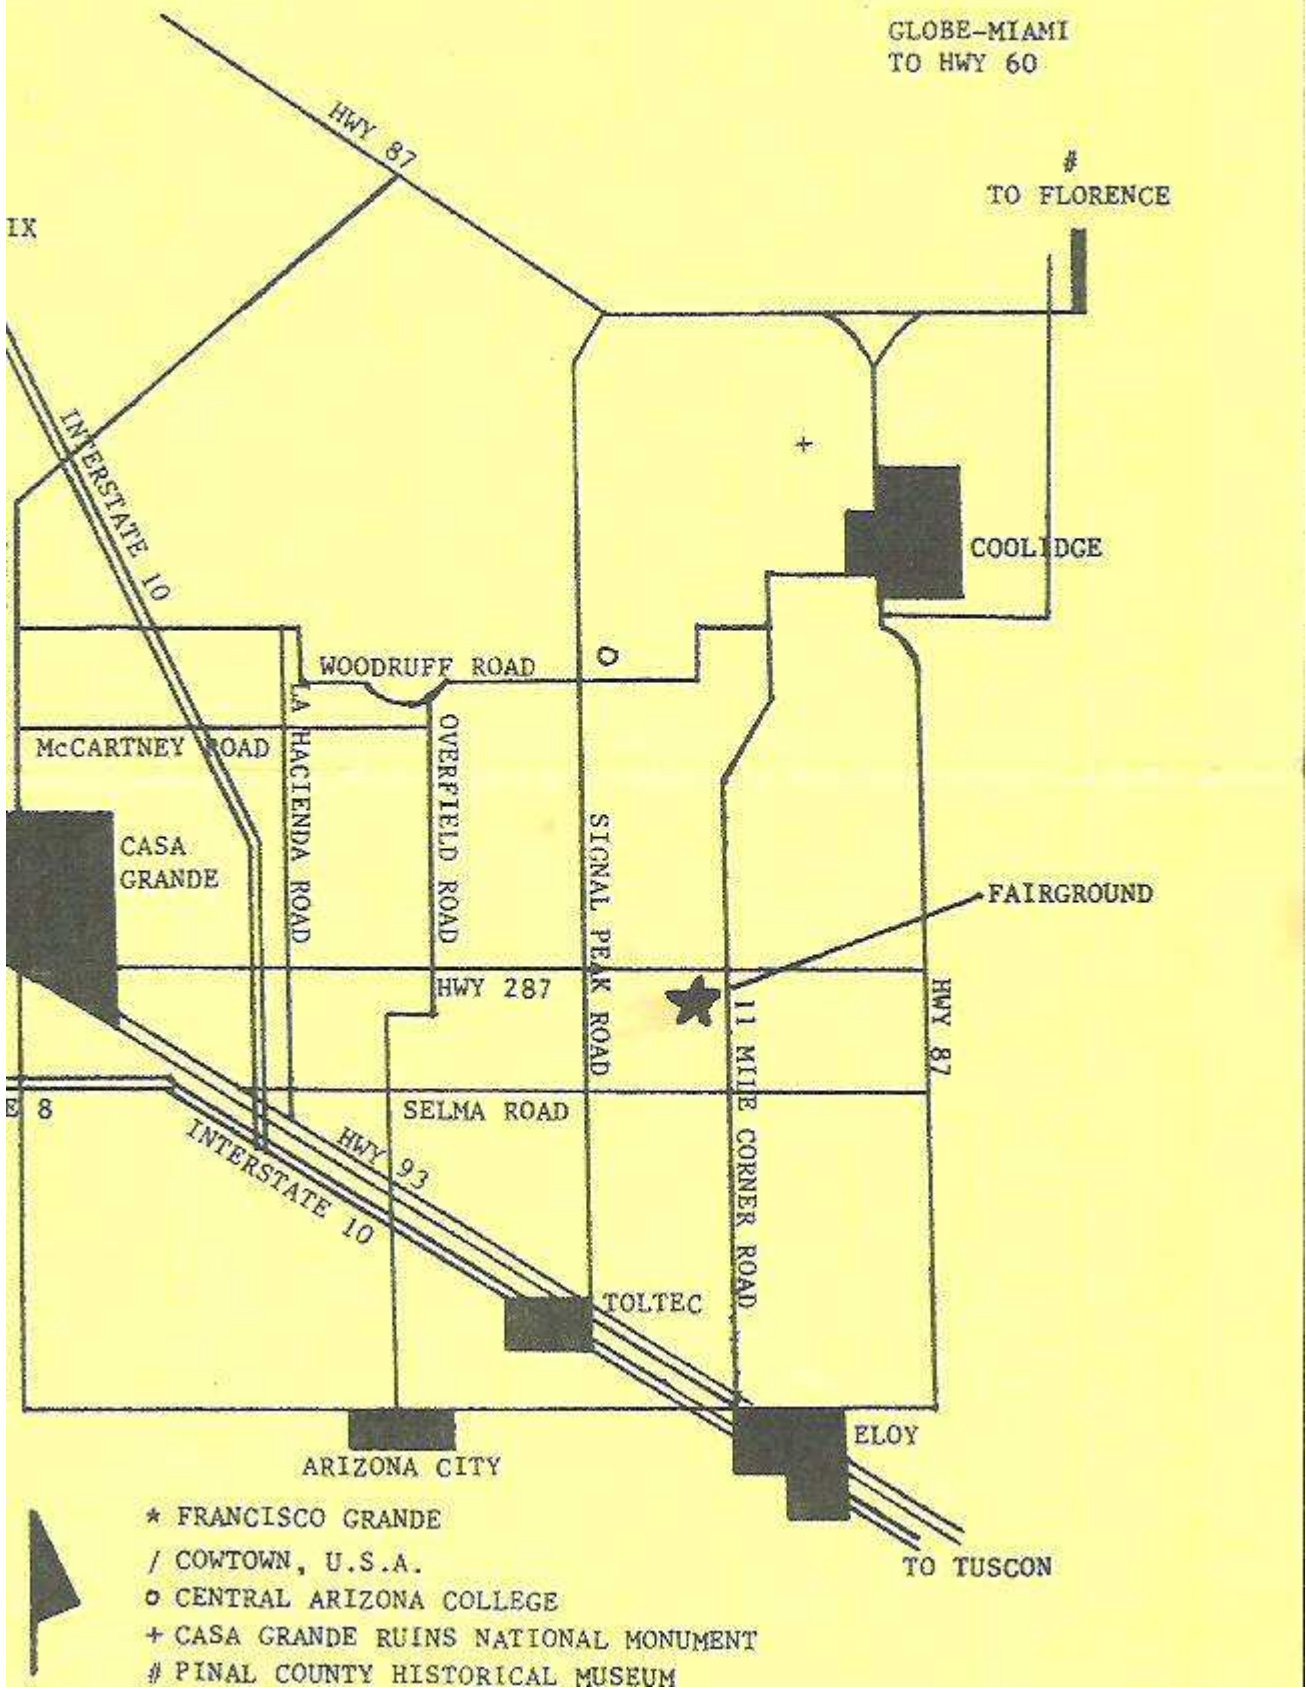

Warren and Nobia Suckow

Co-Hosts

Bill and Theresa Vanderstee

# ULTRA POSTSCRIPTS ★★★★★

By Ernest Newhouse

"A gentle heart finds joy everywhere."

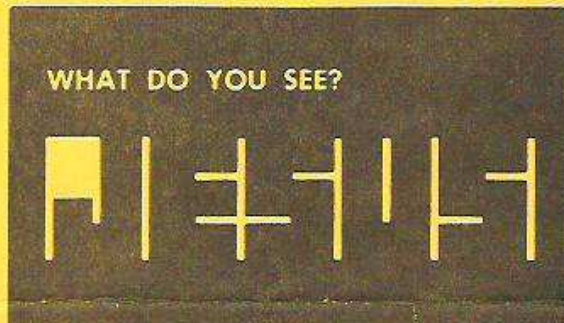

WE JUST HEARD AGAIN from the Fitzgeralds...Margaret writes that Chance is still taking therapy for his left arm. The 18-wheeler-truck driver who hit them from the rear at night was fined only \$35.00 for following too close. I'm sure the sympathy of the entire club goes out to them in their loss and injury, with hope for a complete recovery. They wish to thank everyone again for the concern expressed. Let's include them in our prayers.

DID ANYONE EVER TELL ABOUT the unique stove that George and Marie Hough #414 installed in their coach? At the San Diego rally I looked out early the second day and saw a thin line of blue smoke going straight up from 414 in the cool morning air. Curiosity won! A knock on the door...amazing! A steel-plate airtight heater, about 14"X 18" that burns wood. Novel, very practical, and really a beautiful piece of welded handiwork. George says, "Close the draft and it heats all night." See it at the next rally, sure!

AGAIN CHRISTMAS WILL SOON BE HERE.

"Power, peace, victory, strength, honor, this is the feast....."

If you were arrested for being a Christian, would there be enough evidence to convict you? That's a real risk in some nations of the world today. In this country we still have many freedoms to be thankful for!!! Edna and I take this opportunity to wish everyone a Joyous Holiday Season.

AT THE ARIZONA RALLY Michael Leary #416 brought along his handiwork-display of one of his Ultra tanks that needed repair. Tanks are hard to find lately so Mick simply removed the old and cut out two 18" (prox) square hand-holes in the top. Working through these large openings he cleaned out and then fibreglassed the entire tank interior. Quite an easy way to save the high cost of having a new tank made. In other words, you use your old tank as the "form" or support and make it like new with an entirely brand-new interior. The top openings are merely fibreglassed shut as a final step. Thanks Michael for this restoration method. Now we know why some members pay their dues 2-3 years in advance when tips like this save hundreds of \$s.

FIRST MAN; "Why, I used to hunt bear with nothing but a club."

2nd MAN; "Weren't you scared?"

FIRST MAN: "No, there were sixty people in the club."

TONE OF THE TIMES: Smoking too many cigarettes causes cancer, doctors say. Now medical authorities tell us that too much sugar in one's diet can also be a cause. They say to cut down on sweets. It seems that too much of any good thing is harmful.... like, for example, even money. When governments issue too much it becomes cheaper and worth less, as we have all noticed.

Those few of us who worked to produce the Newsletters, Reports, Rally Flyers, Minutes, other items for this mailing (Roma, Virginia, Joy, Warren, Marion, Edna, Evy, the rest), did so NOT for personal gain, of course, but with the thought their efforts might prove useful or be of interest to fellow club members. Each of us hope the membership appreciates this humble effort on our part. Now and then someone will express a comment or a thank you to the few who carry this heavy load for the club. After all, if no one had produced this mailing (and all the others during the year) nothing would be going out now.

HEARD A GOOD ONE a few months ago: The club's Corvair Expert #434 said that if your Ultra Coach brakes should ever fail (or your car brakes, for that matter) you still have another final alternative in case of some emergency when you must be able to stop quickly. I think all of us would do well to keep this in mind when driving any breed of vehicle, be it car, truck, or motorhome. As a "last straw" we can always shift into reverse. Doing that will stop you - skid the tires - might also do transmission damage, although in one case nothing was harmed. Be sure to warn the co-pilot before you do it, or you might just lose her out the windshield. CAUTION: Do NOT use this method except in a dire emergency. Model-T Fords: caution does not apply.

GOT A NOTE TODAY from member #494, Stanley Plamowski. He asks about the club planning a Baja Caraventure to Mexico for 1980, late Spring or early Fall. Is there anyone who would like to head this up?

The National Ultra Rally at Hannibal, Missouri, proved again that club members really enjoy traveling the great outdoors to new places. The owners of the campgrounds were most hospitable; even the colorful ducks quacked a loud welcome. Newspaper Reporters and a Photographer gave us a very good writeup. The Television Station put ULTRA CLUB out over the airwaves with interviews and full-color shots of our encampment which many of us watched on TV the following night. It was my first time on the air since being staff announcer at KGFK right after my college days. A letter expressing the appreciation we all felt was due the owners of Bay View Campgrounds, has been written to Motor Home Life for the "You Wrote It" page (which should appear in the magazine eventually). We thank the Lyles and Allmans for a fine rally.

Little boy to grocer: "Where do you keep the wild oats?"

BACK IN 1946 I wrote a book on improving mileage and performance of cars. Now, with gasoline prices going up and up, we might give a couple of those suggestions that will add extra mileage to your car or coach:

(A) At each stop light where you expect the light to hold you over half-a-minute, manually pull your Shift Lever into neutral. Doing this will not only allow your transmission to cool down a trifle, but it relieves a load on the engine, helping to increase its life and extend its performance and total road mileage before repair.

(B) Make certain before each trip that your tires are equally inflated, side to side, and with proper air pressure all around. "Proper" means "based on load" more than merely the manufacturer's specifications. We prefer that tires be a few pounds over-inflated, for best gas mileage and tire life rather than a few pounds under. And...always check inflation before driving when the tires are cool - never after driving even though it be only a block.

WOMAN TO NEIGHBOR: "I just can't get used to seeing a beard and ponytail on the same head."

Upon arriving back in sunny California after almost seven weeks away on the trip to Missouri, I called the Ready Reserve Company, then drove over to pick up our latest order of dehydrated products. We have been dealing with this factory division for around ten years now. The girl in Customer Service said she thought they had processed at least a dozen orders from all over the country in which my name had been mentioned...."you are our only wholesale account who lets customers order at your cost." I told her, "They are my friends." It is gratifying to be in a position once in awhile where one can be of a little service to one's ULTRA friends.

NEXT RALLY YOU ATTEND locate P.W. Donaldson #436. Admire the brick wall he installed by Evelyn's range. Edna liked it, so now #603 has brick too. Sure looks heavy and substantial! We don't need to live with woodgrain everywhere...a wall or two of something else puts spice in one's wife -er-er-er-er- meant to say - in one's LIFE.

The meeting was called to order at 1:25 p.m. by Pres. Elga Green. The members joined together singing the Club's song, "Spirit of Ultra", written by Rachael Helander as shown on page B of the Member's Directory. Then the guests were introduced.

The minutes of last year's general National Rally meeting in Greenville, Ohio were read by Virginia Lyles and accepted.

Edna Newhouse read the treasurer's report:	Previous Balance:	\$1,506.83
Disbursements:	\$1,931.10	
Receipts:	650.70	Minus 1,280.40
		Balance: <u>226.43</u>
Transferred from Savings Account:		1,000.00
	New Balance:	1,226.43
Present balance in Savings Account:		1,000.00

The treasurer's report was accepted.

Ken Casselman, acting wagon master reported 45 coaches registered: 42 Ultras and 3 brand X (including Mechems, of Oregon). There were 13 coaches from the West and 32 from the East (the Continental Divide being the dividing line). Nineteen states were represented: Calif. having 10 and Florida & Ohio tying for second place with 5 each.

Ken Casselman suggested that the kindness and good treatment (beyond the line of duty) of the owners of the Bayview Camp Grounds (Roy & Sheran Woods) be acknowledged. Ernie Newhouse volunteered to write a letter of recommendation for them to the Mobile Home Life Magazine and Good Sam and send them a copy.

Warren Suckow announced that they, along with Bill and Teresa Vandersteeg were hosting a rally Jan 24-27, 1980 at the Casa Grande Fair Grounds of Pinal County, Ariz., approx. 60 miles South of Phoenix, at Eleven Mile Corner. Rates: \$1.50 per night with no hook-ups and \$3.50 per night with elec. A heated recreation hall will be available, along with showers and rest rooms. Casa Grande will be celebrating their 100th anniversary. There are Indian ruins to see 12 miles away at Cooleage, Ariz. You all come.

Dick and Helen Evans will host a rally the last week-end in March: 28th to 30th. at Ponce de Leon, Florida.

Gilbert Coen announced that he and Melva will be hosting an E.M.U. rally in Athens, Ohio on June 6-8, 1980.

Possibly there will be an E.M.U. rally in Greenfield Village, Detroit, Mich. Aug. 1-3, 1980.

Gus Brining reported that the next National Rally will be in Hutchenson, Kansas Oct. 8-13, 1980. It was stressed that all Westerners are welcome at the E.M.U. rallies and all Easterners welcome at the W.M.U. rallies.

Plans are being worked on for Pat & Stella Coxsey to host a W.M.U. rally in July at Lompoc, Calif. The W.M.U. is in need of a host and location for April.

Thanks were given to the Lyles & Allmans for planning and hosting this rally, and to the Yakels and Helanders for being the coffee queens, as well as to Kea Casselman for acting as wagon-master.

Al Lyles gave a report on yesterday's director's meeting, including that it was unanimously voted to retain the State Farm Insurance we have of \$300,000.00 liability and \$50,000.00 property damage to protect the individual members

It was also reported that the directors had voted to allow the E.M.U.s to retain a petty cash fund (to draw upon when needed) of up to \$25.00 from moneys left over from their rallies; though basically, each rally is expected to be self-supporting.

The Coxseys, from Lompoc, Calif., received the prize for coming the farthest to the rally, about 1,900 miles. Minnie Allman presented them with a hand made white pillow with an Ultra Coach embroidered on it and "Hannibal Oct. 1979". She presented Paul Robinson of St. Louis, Mo. with a tiny pillow for coming the shortest distance.

Richard Allman presented Gus Brining with a "Do Nothing" traveling trophy for having gone the longest without making repairs or changes on his coach. The period of time had been 2 months. He is to pass it on next year.

Ron Austin of Madison, Wisc., the club photographer took a picture of the group.

Gus Brining stated that if anyone would be willing to print up Ultra Coach cards to let him know: cards similar to what Phil Phillips of Van Nuys used to have made.

The death of club member Robert Brown of Lompoc, Calif. was reported. We were sorry to hear that.

Get well cards were signed for Marion Rumble of Toronto, Canada, and Chance Fitzgerald of Alabama. Chance was to be operated on the following Monday.

The meeting was adjourned at 2:10 p.m.

The drawing was then held.

" THANK YOU GOD FOR LITTLE THINGS "

By Victor A. Reisig

I thank you God for little things  
Like babes in arms and wedding rings

Like eyes that see and lids that blink  
For brains that function when we think

For knees that bend and feet that walk  
For friends who listen when I talk

For those who hear us when we sigh  
And let us on their shoulder cry

For little babies who can hear  
All kinds of sounds that fill the air

I thank you God for every smile  
I thank you God for every mile

I know, dear God, that you are real  
That Your presence we can feel

You care for us, provide for us  
And sent Your Son to live with us

He came to us from up above  
To demonstrate your endless love

So help us in this life of ours  
Not to waste the precious hours

Help us to place our faith in Thee  
From sins and worries, set us free.

Victor Reisig #280
